

FLAGLER BEACH HOUSEHOLD HAZARDOUS WASTE CLEAN OUT CAMPAIGN

Saturday, May 18, 2019, 8AM to 1 PM, Library Parking Lot, 315 S 7th St, Flagler Beach

Flagler Beach has partnered with Flagler County to offer this convenient opportunity to Flagler County residents to keep hazardous materials out of the environment.

Acceptable Materials for Disposal

- All types of paints and solvents
- All type of pool chemical
- All types of fungicides, herbicides, pesticides and fertilizer (below 36% ammonium nitrate). No Chlordane, Lindane, Silvex or DDT
- Pressurized cylinders to be limited to propane tanks of 30lbs. or less, fire extinguishers and carbon dioxide cylinder, NO EXCEPTIONS!
- Resins and catalyst components, labeled
- New and used oil, limit of day, 50 gallons
- Oil and fuel filters
- New and used coolant
- All types of aerosol including FREON
- Road and boat flares
- All types of bulbs
- All types of mercury containing devices
- Household electronics excluding CRT TVs and CRT computer monitors

Have questions about the drop off materials?

Contact Larry Williamson at the Flagler County Landfill (386) 517 - 2075

Flagler County residents may dispose of these items free of charge at the Flagler County Landfill.

1700 South Old Kings Road
Monday through Friday
7:00 AM to 3:30 PM
(386) 517-2075

Materials NOT accepted at event or landfill:

- Sharps or any type of medical waste
- Smoke detectors
- Asbestos
- Ammunition or gunpowder
- Gasoline
- Unknown/Unlabeled
- Peroxides over 10%

No waste from businesses or municipalities

Tires limited to 24 per event/3 per person
NO RIMS!

DID YOU KNOW?

According to the EPA, it is not industry, but the cumulative effects of citizens, who contribute the most pollution to our nation's waters. As individuals, we can make small changes in our habits that add up to big improvements.

Do you know the difference between a sanitary sewer system and a stormwater sewer system? The two are easily confused because the term "sewer" is used in both names. But the two are very different. A **sanitary sewer system** takes the waste water from your kitchen and bathroom drains and pipes it to a wastewater treatment facility to be cleaned. A **stormwater sewer system** collects rainfall and landscape irrigation water. Some of the water soaks into the ground to water our plants and replenish the water table, but some flows through street gutters and swales to the Intracoastal Waterway, picking up debris and pollutants along the way.

This is why you should

Here are a few tips to help reduce the amount of pollution entering our waterways.

In the Home

Don't pour grease, oil, or cake frosting down the kitchen sink. Pour it into a container, and throw it away. Clean paint brushes in a sink, not outdoors. Filter and reuse paint thinner when using oil-based paints. Donate unused paint to a local organization, or take advantage of the Clean Out Campaign advertised on the front of this paper.

Pet Waste

City Ordinance requires pet owners to pick up after their pets on the beach, on the streets, in our parks, and on vacant lots. You **KNOW** it's the right thing to do. It's a good idea to pick up pet waste regularly in your yard as well, as it contains several types of pathogens. Children playing in the yard or adults working in the garden may come in contact with these disease-causing bacteria and viruses. Rain may wash these pathogens into the storm sewer system.

In the Yard

Many of us tend to over fertilize our yards. Read the manufacturer's instructions, and use fertilizers sparingly. Avoid pesticides and herbicides. Contact the County Extension Agent for information on controlling pests in an environmentally responsible way. Selecting plants that are native to our area require less water, fertilizer and pesticides, saving you money.

Check your car, boat, motorcycle and other machinery for leaks and spills. Make repairs as soon as possible. Clean up spilled fluids with an absorbent material like kitty litter or sand.

Dispose of the absorbent material properly. Don't hose it down into the street and into the storm drain. Use a broom to sweep your driveway and sidewalk. The water hose sends grass clippings, grit, oil, and other pollutants into the stormwater sewer system.

If possible, wash your vehicle on the lawn. Using soap on a car parked in the driveway sends soapy suds into the streets and on to the ICW.

The Swimming Pool

Drain it only when a test kit does not detect chlorine. Allow it to soak into the yard, not flow down into the street.

Never drain your pool into the Intracoastal Waterway; it is a violation of City Ordinance on Illicit Discharge. Store pool chemicals properly to prevent leaks and spills, preferably in a covered area.

Remember this simple guidance: Dump nothing into the stormwater system that you wouldn't drink or swim in.
